

AQUAGRI-KNOW Operational Groups

Empowering farmers with practical knowledge and innovative solutions for efficient on-farm water management

Operational Groups (OGs) are at the heart of rural innovation in Europe. These EU-funded partnerships bring together farmers, researchers, and other experts to co-create and test practical solutions directly in the field. AQUAGRI-KNOW amplifies this work, acting as a bridge to share the knowledge and successful outcomes from these projects, ensuring their innovative and practical solutions can benefit farmers across Europe.

The project also:

Builds on high-quality OG outcomes with high adoption potential.

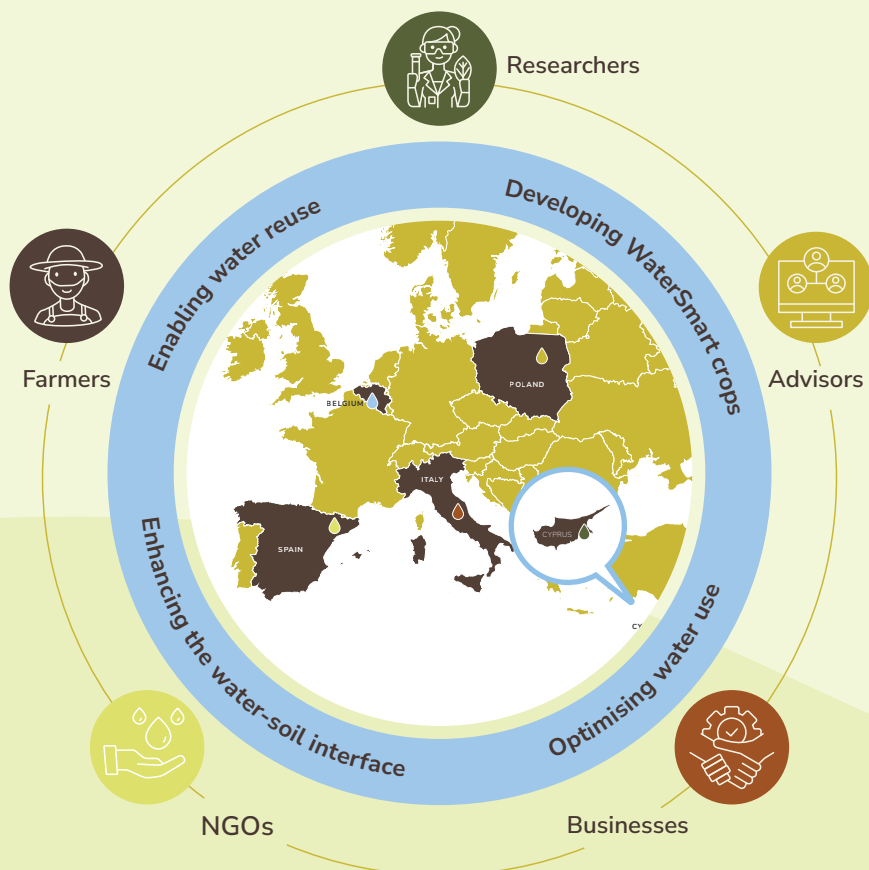

Engages representative countries experiencing water scarcity and water quality concerns.

Ensures knowledge collection, transfer, and upscaling of complementary solutions.

Spotlight on Our Operational Groups

AQUAGRI-KNOW builds on the experience and outcomes of 12 pre-selected EIP-AGRI Operational Groups from 5 EU Member States. These OGs focus on four key aspects to improve the water value chain.
